Good Afternoon Jennifer,

Due to proximity in location and having enough time to tour each facility, I would like to propose that we change out Jackson Family Dairy, DeGroot Dairy, and Dry Lake Dairy with the following facilities:

- Monday April 1, 2019 Van Es Dairy: 8222 Desert Drive, Marsing, Idaho 83639
- Tuesday April 2, 2019 DeRuyter Dairy: 4699 Buntrock Road, Marsing, Idaho 83639
- Tuesday April 2, 2019 Nederend Dairy: 4998 Hogg Road, Homedale, Idaho 83628

These facilities are also larger in size and unique for touring purposes. Please let me know if you have any questions or concerns.

Best,

Emily Montague

Thanks so much, Emily!

Per Region 10 protocol, please do not confirm appointment times for these inspections. I believe the plan is for them to be unannounced (Steve, please correct me if I am wrong).

Can you provide addresses or coordinates for these sites so that we can prepare maps/aerial photos for our site visits?

Thank you!

-Jennifer

Dear Jennifer,

The following is a list of the facilities we can visit during your stay in the Treasure Valley. The majority of the producers are on site between 7 am and 2 pm. If you need me to confirm an appointment time with each producer please let me know. Let's plan on the following schedule:

- Monday since we only have time for one facility we can visit Jackson Family Dairy. It is located in Meridian, Idaho and would be close by for easy access.
- Tuesday we can visit Dry Lakes Dairy in Nampa, Idaho and DeGroot Dairy in Melba, Idaho .
- Wednesday we can visit Vandenberg & Son and Doornenbal Dairy in Caldwell, Idaho.
- Thursday we can visit TLK Dairies 1, 2, and 3 and Sunview Dairy in Mountain Home, Idaho.
- Two spare facilities to have on our list if we have time would be Ed Oppedyke Dairy in Mountain Home, Idaho and Beranna Dairy in Caldwell, Idaho.

If you have any questions or if there is anything I can provide to you prior to your arrival please let me know.

Best Regards,

Emily Montague

Jennifer,

There shouldn't be any difficulty getting to a facility before 2 PM with your arrival time at 10 AM.

Best,

Emily Montague

Thank you for the clarification, Steven. Sirese and I can look at alternate travel arrangements if necessary to avoid the need to coordinate with an operator in advance. Emily, based on your response below, do you think it's not possible to get to a facility before 2 with a 10 AM arrival in Boise?

Thanks!
-Jennifer

Mitch, Emily and Dr. Adhikari,

In general EPA does unannounced inspections as it allows the inspector to observe normal facility operations, rather than a facility that has been prepared for an inspection. All the CAFO inspections that have been conducted over the past several years and the last round in Idaho were unannounced. EPA does announce certain inspections like Military Bases, North Slope Remote Oil Facilities, and Oil Platforms. It just depends on the type of facility and situation.

Dear Jennifer,

I will see if I can coordinate a facility with a producer available at that time. Typically the producers have left by 2pm, but I will see what we can come up with and get back to you soon.

Best Regards,

Emily Montague

We're looking at flights – can you let us know if this passes the laugh test?

The earliest reasonable flight to Boise on Monday arrives at 10 AM. We're thinking we could be to EPA by 11, meet your folks and IDEQ somewhere, and get out to a facility no later than 2. Does that sound right to you? And is my assumption correct that you meant we need to be at a facility by 2 to find an operator there? Or did you mean that we need to finish up with inspections by 2?

Thank you!
